

CRLP Meeting Summary

Date: January 15, 2015

Location: BLM Office Amarillo, TX

Attendees: BLM - Robert Jolley, Samuel Burton, Janet Huff, David Reeves
CRLP- Nick DeMai

The BLM and CRLP met via teleconference on Thursday Jan 15, 2015 at 2:00 -3:00 PM. Robert Jolley, Janet Huff, David Reeves, and Sam Burton attended the teleconference for the BLM and Nick DeMai represented the CRLP to discuss the following topics:

1. BLM Stand Alone Compressor Start Up Plan
2. BLM's new Environmental Engineer's Requirements
3. BLM/CRLP contract revision process (On-Going)
4. DCS repairs and BLM's participation level
5. BLM budget payments to CRLP
6. CRLP Non Disclosure Form for contractors

The meeting was about an hour long. The CRLP is concerned about getting more timely review and sign off for the routine budget/invoice payments. Janet was letting all parties know that new agreement regulations are in effect as of Dec 26th, 2014. These new regs will have an impact on the new funding agreements needed this next year. The CRLP has proposed a capital project to replace the DCS process control system at Cliffside due to obsolescence and increased downtime, but the BLM position is that it could not be included as a capitalization item but could be done as direct reimbursement. Repairs to the current system were seen as Major Maintenance (CRLP does not agree). Three management consulting invoices were contested as reimbursable with disposition deferred to a later time.
