(Downtown) Emress B. Marji B.

(NOC)

(CRLP) Nick D. Mike D. Brad B. John S. Tony K.
Bobby S. Kaylyn S. Tom H. Rick G.

Roll Call

➤ Noted

Nick D.-Any update on COVID, I'm not expecting to hear any.

Mark M.-There have not been that many changes. We sent several employees to be tested they were all negative.

Nick D.-Based on what I heard last week, we understand that they are compliant to DOI standards but they are not the same as some of the partner companies. I'm going to refer this to the companies that are going to site to work. Nothing has changed tentative for the 26th work, but they need to be in there this week to do pre-work. The other work was pushed out until November 9th. Since the companies have standards that may exceed the BLM standards, the companies have to work to the higher standard. Brad you need to identify what your work rules must be and then the BLM can look at that and the same thing John with your work.

Mark M.-Yes, I understand.

Nick D.-Marji if you can get that to Sam. Mark I think the safety team needs to be engaged in it. Just give me a call if you want to chat about it. That was really the big issue, schedule tentative 26th and November 9th.

Mark M.-Pressure is right where we want it. Operations are going smoothly. Seal leakage on the north methane pump took a dive. It went into this phase where we add fluid every shift.

Brad B.-As long as they are maintaining it then we should be fine for now.

Nick D.-I don't have anything else.
