(Downtown) Emress B. Sam B. Mark W.  
(NOC) David S. Cindy G. Emmett L.  
(CRLP) Nick D. Bobby S. Bob L. Kaylyn S.  
Tony K. Brad B.

### Roll Call

➤ Noted

### Antitrust applies, multiple companies on the call.

**Nick D.**-Traveling starting tonight for about a month. Should be able to contact me throughout my journey. If there are problems reaching me please reach out to Brad B., Tom H., or Bob L., Tony K.

Brad H. I do not have the list for security. I will get with them and see if we can't get some information back to you this week.

Ongoing activities: TCEQ support work with quotes due into the BLM

**David S.**-I am not sure, Emmett do you have an update?

**Emmett L.**-Quotes received Friday we are working on paperwork now; the start date should be good. The date we had in there originally should work.

**Nick D.**-Was there a target for completion.

**Emmett L.**-I am not sure. I can look it up.

**Nick D.**-Sure if you have it before the end of the call or you can shoot me an email.

Kaylyn, I saw you sent me a proposal, I haven't had a chance to read it yet. It is residue reinjection work and flare control work.

PHA review this week or next week, are we still working toward that?

**Brad B.**-That is still on schedule we will be out there Monday through Thursday.

**Nick D.**-Building ventilation review anything new?

**Brad B.**-No they are still working on that.

**Nick D.**-Compressors there were some general comments, talk of power saving. Brad B. you weren't on the call last week, Mark raised possibility of pocket adjustments for power savings.

**Brad B.**-We would recommend to not unload the K100. It is going to increase some of the temperatures across the head end. I can send you recommendations of what we could do.

**Mark M.**-That is good enough for me Nick.

**Nick D.**-I did take a scan of the data that was on the BLM website at least through last week. Methane pumps we talked about a swap out with a screen

**Brad B.**-I will look at that next week while I am out there.

**Nick D.**-I don't have anything other than the items you see listed there. If there are any comments or questions let's proceed to that.

**Brad B.**-Did you get the MOC from the BLM for the wiring change?

**Mark M.**-We are still working on that MOC.

**Nick D.**-I have a couple of revised proposals, but I will get with Melissa about those. We will await the MOC and Melissa and I will talk.

**Brad B.**-Is the CO2 analyzer operating?

**Mark M.**-I believe we did, Seth changed out the absorber.

**Nick D.**-Is that a periodic PM?

**Brad B.**-It should last a year if you don't have any plant upsets.

**Sam B.**-There will be a lot of people in COR training next week if we can push the meeting back.

**Nick D.**-Ok next meeting will be pushed to March 3<sup>rd</sup>.
