(Downtown) Emress B. Marji B.
(NOC) David S. Cindy G.
(CRLP) Nick D. Bobby S. Kaylyn S. Brad B.
Mike D. Tony K. Nick H. Bob L.

Roll Call

➤ Noted

Nick D.-Any changes to company or BLM policies about COVID.

Marji B.-The state director sent out an email Friday that he received a draft adaptive recovery plan for employees to return to the office. That is all I have about that for now.

Nick D.-Update on plant operations?

NONE.

Mark M.-The plant is running well. I mentioned earlier the site glass was broken, that was not the case it was just a blown-out gasket. We have replaced that gasket. There is another bad valve on cylinder 2 on the K100. The temperatures are well under the alarm level I just wanted to get the FLIR camera out and verify which valve it was. The pressure is at 1256.

Nick D.-I appreciate the detail you provide.

Tony K.-So I am clear here we are going to continue to run with this valve, if things get worse then we will respond just keep me posted.

Nick D.-There is not a storage holder call today so you should have seen that email from Carole this morning.

Brad last we left on the security badges I am sure it is like everything where they are working from home. Do you have any updates on badges?

Brad H.-I do not have any updates I think no news is good news since nothing has been kicked back.

Nick D.-We are still curious to know how the process works. Something is going to come back and then an email will be sent. The question is then what?

Brad H.-The call comes from the security people and they tell you what is next.

Nick D.-Ok so that is what we will await.
