Subject: November 20, 2012 Correspondence re: Request for Correction or Supplementation of the Oil Shale and Tar Sands Programmatic Draft Environmental Impact Statement

Mr. Gardner, Mr. Eardley, and Mr. Drake,

Thank you for your correspondence regarding the Oil Shale and Tar Sands PDEIS. I am seeking clarification regarding your correspondence. Your letter reads to support the Uintah County Information Quality Act (IQA) Information Correction Request (ICR). I need to know if you are also seeking to file this as a separate ICR. If that is your intent (to file separately), there is additional information that is required in order to process your request in accordance with the BLM IQA Guidelines (see link below). If you are only filing in support of Uintah's submission, then we will attach it to their filing and consider accordingly.

I thank you in advance for your clarification.

Respectfully,

Corey Wells.
