H-6300-1-WILDERNESS INVENTORY MAINTENANCE IN BLM OREGON/WASHINGTON

APPENDIX B – INVENTORY AREA EVALUATION

Evaluation of Current Conditions:

- 1) Document and review the existing BLM wilderness inventory findings on file, if available, regarding the presence or absence of individual wilderness characteristics, using Form 1, below.
- 2) Consider relevant information regarding current conditions available in the office to identify and describe any changes to the existing information (use interdisciplinary (ID) team knowledge, aerial photographs, field observations, maps, etc.), and document your findings on Form 2, below.

When Citizen Information has been submitted regarding wilderness characteristics, document the submitted materials including: date of Submission; Name of District(s) and Field Office(s) Affected; Type of material Submitted (e.g. narrative, map, photo). Evaluate any submitted citizen information regarding the validity of proposed boundaries of the unit(s), the existence of roads and other boundary features, the size of the unit(s), and the presence or absence of wilderness characteristics based on relevant information available in the office (prior BLM inventories, ID team knowledge, aerial photographs, field observations, maps, etc.)

Conduct field reviews as necessary to verify information and to ascertain current conditions. Reach conclusions on current conditions including boundaries, size of areas and presence or absence of wilderness characteristics. Fully explain the basis for each conclusion on form 2, including any critical differences between BLM and citizen information.

Document your findings regarding current conditions for each inventoried area. Describe how the present conditions are similar to, or have changed from, the conditions documented in the original wilderness inventory. Document your findings on Form 2 for each inventory area. Cite to or attach data considered, including photographs, maps, GIS layers, field trip notes, project files, *etc.*

Year: 2011 Unit Number/Name: OR-035-026 — Deadhorse

**FORM 1 -- DOCUMENTATION OF BLM WILDERNESS INVENTORY
FINDINGS ON RECORD**

1. Is there existing BLM wilderness inventory information on all or part of this area?

Yes No **X** (If yes, and if more than one unit is within the area, list the names of those units.):

A.) Inventory Source(s) -- (X) Denotes all applicable BLM Inventory files, printed maps, or published BLM Decision documents with information pertaining to this unit.

Wilderness Inventories

- () 1978 – BLM Wilderness Inventory
- () April 1979 – *Wilderness -- Proposed Initial Inventory – Roadless Areas and Islands Which Clearly Do Not have Wilderness Characteristics, Oregon and Washington*

Wilderness Decision Documents

- () August 1979 – *Wilderness Review – Initial Inventory, Final Decision on Public Lands Obviously Lacking Wilderness Characteristics and Announcement of Public Lands to be Intensively Inventoried for Wilderness Characteristics, Oregon and Washington* (green document)

APPENDIX B – INVENTORY AREA EVALUATION

Evaluation of Current Conditions:

- 1) Document and review the existing BLM wilderness inventory findings on file, if available, regarding the presence or absence of individual wilderness characteristics, using Form 1, below.
- 2) Consider relevant information regarding current conditions available in the office to identify and describe any changes to the existing information (use interdisciplinary (ID) team knowledge, aerial photographs, field observations, maps, etc.), and document your findings on Form 2, below.

When Citizen Information has been submitted regarding wilderness characteristics, document the submitted materials including: date of Submission; Name of District(s) and Field Office(s) Affected; Type of material Submitted (e.g. narrative, map, and photos). Evaluate any submitted citizen information regarding the validity of proposed boundaries of the unit(s), the existence of roads and other boundary features, the size of the unit(s), and the presence or absence of wilderness characteristics based on relevant information available in the office (prior BLM inventories, ID team knowledge, aerial photographs, field observations, maps, etc.)

Conduct field reviews as necessary to verify information and to ascertain current conditions. Reach conclusions on current conditions including boundaries, size of areas and presence or absence of wilderness characteristics. Fully explain the basis for each conclusion on form 2, including any critical differences between BLM and citizen information.

Document your findings regarding current conditions for each inventoried area. Describe how the present conditions are similar to, or have changed from, the conditions documented in the original wilderness inventory. Document your findings on Form 2 for each inventory area. Cite to or attach data considered, including photographs, maps, GIS layers, field trip notes, project files, *etc.*

FORM 2 -- DOCUMENTATION OF CURRENT WILDERNESS INVENTORY CONDITIONS

Unit Number/Name: OR-035-026 — Deadhorse

NOTE: This inventory unit OR-035-026 is identified herein because an adjacent contiguous federal US Forest Service roadless area (Deadhorse “potential wilderness area”) is presently being studied by the federal US Forest Service (USFS) in support of that agency’s forthcoming Blue Mountains Forest Plan. The Record of Decision (ROD) of the final Forest Plan will include whether or not all or part of the USFS’s “potential wilderness area” will be a designated “proposed wilderness area”. Respectively, given the present status of the USFS’s identity of its “potential wilderness area”, the information herein of OR-035-026 is provided to meet current BLM direction regarding interagency coordination when conducting wilderness inventory. This BLM inventory information would be available – and OR-035-026 subject to further coordinated BLM-USFS wilderness review -- should the USFS’s ROD of the final Blue Mountains Forest Plan designate any of its federal land contiguous to OR-035-026 as a “proposed wilderness area”.

Only Congress can designate federal lands as a component of the National Wilderness Preservation System. When making its decision, Congress can consider federal agencies’ wilderness recommendations (e.g., USFS “proposed wilderness areas” and affiliated qualifying contiguous BLM public lands).

Description of Current Conditions: [Include land ownership, location, topography, vegetation features and summary of major human uses/activities.]

1. Is the unit of sufficient size?

Yes X No

Description: Refer to this inventory unit’s associated Map 1 for its location. The inventory unit is composed of two separated parcels of public land, each abutting and contiguous to the USFS’s current Deadhorse “potential wilderness area”. The north parcel is 174 acres, the south parcel is 40 acres. Together they sum 214 acres of BLM public lands. Size criterion is met by each of the two parcels, because each is contiguous to USFS lands presently being evaluated for possible wilderness. Individually, no BLM parcel meets the size criterion of being greater than 5,000 acres. However, both are contiguous to a same USFS “potential wilderness area” (Deadhorse); thus, for purposes of BLM wilderness characteristics inventory maintenance, the two BLM parcels are addressed under this single BLM inventory unit, OR-035-026.

Common boundary feature for these two parcels is a portion that abuts the USFS administrative boundary to the east, highway 350 to the north, and private lands to the

west. Boundary roads are mechanically maintained as needed to provide for relatively regular and continuous use.

2. Is the unit in a natural condition?

Yes X No N/A

Description: Both the north and south parcels include moderate to major sloped upper terrain that slopes to the west and north for the northern parcel while the southern parcel drains to the west. Vegetation is a varied mix of conifers and juniper (with sage and grasses) on the southern parcel due to its higher elevation, while the northern unit consists of grass and shrub covered rock bluffs. Both parcels are primarily dominated by native and non-native grass and shrub species.

Refer to this inventory unit's associated Map 1 for human imprints. Neither the north or south parcels are impacted by the works of man. Each of the parcels appear to be affected primarily by the forces of nature with the imprint of humans are unnoticeable to the average visitor.

3. Does the unit have outstanding opportunities for solitude?

Yes No N/A X

Description: At this time, no finding is made for outstanding opportunities for solitude. This criterion would be evaluated for this OR-035-026 unit in conjunction with the contiguous USFS lands, should that agency's Blue Mountains Forest Plan ROD include designation of a Deadhorse "proposed wilderness area" which abuts contiguous BLM parcels of this OR-035-026 inventory unit.

Note: Procedures of both the BLM land use planning process (e.g., Resource Management Plan) and of associated environmental review (e.g., Environmental Impact Statement) would be applied for deciding how, in the interim, this OR-035-026 and other BLM wilderness characteristics inventory units contiguous to USFS-designated "potential wilderness areas" and "proposed wilderness areas" would be managed. For USFS "proposed wilderness areas" and their contiguous BLM public lands, coordinated cohesive management direction within both federal agencies would be an objective, so to maintain the contiguous federal lands' wilderness eligibility until such time Congress either designates the federal lands as a Wilderness Area component of the National Wilderness System or releases the federal lands from further wilderness consideration.

4. Does the unit have outstanding opportunities for primitive and unconfined recreation?

Yes No N/A X

Description: At this time, no finding is made for outstanding opportunities for primitive and unconfined recreation. This criterion would be evaluated for this OR-035-026 unit in conjunction with the contiguous USFS lands, should that agency's Blue Mountains Forest Plan ROD include designation of a Deadhorse "proposed wilderness area" which abut contiguous BLM parcels of this OR-035-026 inventory unit.

Note: Procedures of both the BLM land use planning process (e.g., Resource Management Plan) and of associated environmental review (e.g., Environmental Impact Statement) would be applied for deciding how, in the interim, this OR-035-026 and other BLM wilderness characteristics inventory units contiguous to USFS-designated "potential wilderness areas" and "proposed wilderness areas" would be managed. For USFS "proposed wilderness areas" and their contiguous BLM public lands, coordinated cohesive management direction within both federal agencies would be an objective, so to maintain the contiguous federal lands' wilderness eligibility until such time Congress either designates the federal lands as a Wilderness Area component of the National Wilderness System or releases the federal lands from further wilderness consideration.

5. Does the unit have supplemental values?

Yes _____ No X N/A _____

Description:

Summary of Findings and Conclusion

Unit Name and Number: OR-035-026 — Deadhorse

Summary Results of Analysis:

- 1. Does the area meet any of the size requirements? X Yes No
- 2. Does the area appear to be natural? X Yes No
- 3. Does the area offer outstanding opportunities for solitude or a primitive and unconfined type of recreation? Yes No X NA
- 4. Does the area have supplemental values? Yes X No NA

Conclusion * -- check one:

- * The area, or a portion of the area, has wilderness character.
- * The area does not have wilderness character.

** -- No conclusion can be determined at this time. See the discussion under the criterion for outstanding opportunities for solitude and for outstanding opportunities for primitive and unconfined recreation in this Form 2 of this OR-035-026 inventory unit.*
