

**WILDERNESS INVENTORY MAINTENANCE
IN BLM OREGON/WASHINGTON**
(Source: Oregon State Office Internal Guidance as of July 2007)

Year: 2008 Inventory Unit Number/Name: Skull Creek Unit (2-18G)

**FORM 1: DOCUMENTATION OF BLM WILDERNESS INVENTORY
FINDINGS ON RECORD:**

1. Is there existing BLM wilderness inventory information on all or part of this area?

No _____ Yes X (if more than one unit is within the area, list the names/numbers of those units.):

a) Inventory Source: Wilderness Inventory – OR/WA Final Intensive Inventory Decisions (November 1980), Page 119.

b) Inventory Unit Name(s)/Number(s): Skull Creek 2-18G.

c) Map Name(s)/Number(s): November, 1980 Map

d) BLM District(s)/Field Office(s): Burns District – Three Rivers Resource Area.

2. BLM Inventory Findings on Record:

Inventory Source: Wilderness Inventory – OR/WA Final Intensive Inventory Decisions (November 1980), Page 119.

Unit#/ Name	Size (historic acres)	Natural Condition? Y/N	Outstanding Solitude? Y/N	Outstanding Primitive & Unconfined Recreation? Y/N	Supplemental Values? Y/N
2-18G	6,850	N	N	N	Y

**FORM 2 - DOCUMENTATION OF CURRENT WILDERNESS
INVENTORY CONDITIONS**

Unit Number/Name: **Skull Creek Unit (2-18G)**

(1) Is the unit of sufficient size?

Current Unit Acres: **7,315** Yes **X** No

Description of the Current Conditions:

Citizen Information Received:

No citizen information for this unit was received.

Interdisciplinary (ID) Team Meeting: An ID-team consisting of BLM staff from the Burns District met on June 18, 2008 to evaluate this unit. The ID-team was provided with current information and maps. The team consisted of wilderness, recreation, range, wildlife and forestry staff.

Boundary changes since 1980:

The boundary of Skull Creek Unit 18G has changed in two locations; one on the east boundary where a former state section is now BLM-administered land through a land exchange and the other on the southwest corner where a route is now a maintained road to a private parcel around Horse Spring.

Current Unit Boundaries:

N. boundary: Road 7209-0-00 (section of Upper Culp Ranch Road W. of Skull Cr. Road Jct. and E. of Willow Res. Road Jct.)

E. boundary: Road 7203-0-00 (Skull Creek Road); State Line Reservoir Road; private land in northeast corner

S. boundary: Horton Mill Road

W. boundary: Willow Reservoir Road; Horse Spring Road; private land (Horse Spring)

Prior to the ID-team meeting, original inventory boundary information was reviewed and BLM staff that are knowledgeable about the area were also consulted to determine preliminary unit boundaries.

The ID-team concurred that the boundary roads above have been mechanically improved or maintained at some point and would be maintained as needed in the future. The roads are in a useable condition and use does occur on a relatively regular basis associated with recreational use by the public, private land access and permittee and BLM use associated with rangeland and forest management. Most of this use occurs in the summer and fall.

(2) Is the unit in a natural condition?

Yes _____ No X N/A _____

1980 Unit Description:

Skull Creek Unit 2-18G contains 6,850 acre of public land and a 160-acre private inholding located thirteen miles northwest of Burns. The general elevation is 4,800' with topography ranging from broad, flat, rocky areas to gently rolling hills and a well-defined canyon (Skull Creek) in the north. Vegetation included big and low sagebrush, some ponderosa pine, juniper, mountain mahogany and bitterbrush.

The 1979 Wilderness Inventory Situation Evaluation noted interest in oil, gas and geothermal resources. Human activities included off-road vehicle use, rock hounding, artifact hunting, fishing, heavy deer, antelope and sage grouse hunting, and trapping for coyotes and bobcats.

Current Condition Description (See Unit Character Map):

The primary human uses in the unit and surrounding lands are livestock grazing related as well as dispersed recreation use, wood cutting and post cutting. Some timber harvesting on adjacent private land parcels has occurred and routes on public lands in the unit have been upgraded and maintained to allow hauling of logs.

The Skull Creek Road (unit's east boundary) has 100' fuel breaks cleared on both sides of the route for approximately 25 miles. About five miles of fuel breaks are within the unit. Three juniper thinning/piling areas each under 100 acres have been completed in the past several years and there are numerous interior routes. A division fence goes through the entire length (N-S) of the unit with a cross-fence in the SE corner.

The unit is in close proximity to Burns and Hines, the main population centers in Harney County, and is regularly used for dispersed recreation activities. Off-road use by motorized vehicles associated with hunting primarily occurs on established routes. Winter sports activities (cross-country skiing, sledding, tubing and snowmobiling) occur when acceptable snow depths are available.

Below is a summary of developments and vegetative treatments:

Fences: 7 miles
Cattleguards: 2
Reservoirs: 6
Springs: 1
Juniper cutting: 154 acres
Interior Routes: 19 miles

(3) Does the unit have outstanding opportunities for solitude?

Yes _____ No _____ N/A X

(4) Does the unit have outstanding opportunities for primitive and unconfined recreation?

Yes _____ No _____ N/A X

(5) Does the unit have supplemental values?

Yes _____ No _____ N/A X

Summary of Findings and Conclusion

Unit Name and Number: Skull Creek Unit (2-18G)

Summary Results of Analysis:

1. Does the area meet any of the size requirements? X Yes ___ No
2. Does the area appear to be natural? ___ Yes X No
3. Does the area offer outstanding opportunities for solitude or a primitive and unconfined type of recreation? ___ Yes ___ No X NA
4. Does the area have supplemental values? ___ Yes ___ No X NA

Conclusion (Check One):

- ___ The area-or a portion of the area-has wilderness character.
- X The area does not have wilderness character.
