- (1) The performance goal for FY 2011 was to have 93% of the BLM's organizational units rated in good safety, health, and environmental condition which is one percent higher than last year's performance.
- (2) The above data includes audits performed from October 1993 through June 2011 and responses from the field on the findings from those audits through July 2011.
- (3) FY 2011 is the seventh fiscal year in which an organizational unit must have all its high priority CASHE findings completed to be rated in good condition. This standard has been phased in since FY 2000 when an organizational unit could have up to five high priority findings and be rated in good condition. Each fiscal year since FY 2000 the good condition standard has been reduced by one high priority finding until it reached zero in FY 2005.
- (4) FY 2011 is the third year Radio Infrastructure (RI) CASHE audit findings count towards determining whether an organizational unit is rated in good condition.
- (5) In FY 2011 an organizational unit must have zero incomplete high priority traditional CASHE findings and three or fewer high priority RI CASHE Radio findings to be rated in good condition.
- (6) In FY 2012 an organizational unit must have zero incomplete high priority traditional CASHE findings and two or fewer high priority RI CASHE Radio findings to be rated in good condition. The incomplete number of high priority RI CASHE an organizational unit may have and be rated in good safety, health, and environmental condition will continue to be reduced each fiscal year until it reaches zero in FY 2014.
