

Attachment 2: Comprehensive Animal Welfare Policy Gather Assessment Tool

Summary: The Comprehensive Animal Welfare Policy (CAWP) Gather Assessment Tool is a MS Access database that has been developed as a means to assess, standardize, and track CAWP compliance. The following document contains screen shots of the standardized forms from the tool and details the information that will be collected during a gather assessment.

Form #1: Gather Cover Page

The screenshot shows the Microsoft Access application window titled "CAWP Gather Assessment Tool Revised 15.Sept.2015 : Database (Access 2007 - 2010) - Microsoft Access". The form is titled "Gather Cover Page" and is in "Form View". The form contains the following fields:

- Gather ID:** A text box with a "New" button and a note: "Gather ID will be auto-assigned when uploaded to central database."
- Date Gather Started:** A date picker field.
- State:** A dropdown menu.
- District Office:** A text box.
- HMA:** A text box.
- Contractor:** A text box.
- Pilot(s):** A text box.
- Number of Wranglers:** A text box.
- Reason for Gather:** A text box.
- Comments:** A large text area.

The form is displayed over a background image of horses running in a field. The Microsoft Access interface includes a ribbon with "File", "Home", "Create", "External Data", and "Database Tools" tabs. The navigation pane on the left shows a list of tables and forms. The taskbar at the bottom shows the Start button, several application icons, and the system tray with the date and time: "8:21 AM 9/17/2015".

Form #2: Day of Assessment Information

The screenshot shows a Microsoft Access form titled "Day of Assessment Information" in a window titled "CAWPGatherAssessmentTool_Revised 15.Sept.2015 : Database (Access 2007 - 2010) - Microsoft Access". The form is displayed in "Form View" and contains the following fields and instructions:

- Gather ID**:
- Assessment ID**: (New)
- Instructions**: Gather ID must be obtained from Gather Cover Page once it has been entered into central database. Assessment ID will be automatically assigned when uploaded to database.
- Assessment Date**:
- Assessor Name**:
- Site In HMA**:
- Lead COR**:
- PI**:
- IC**:
- Horse Specialist**:
- Public Affairs Officer**:
- Veterinarian**:
- Expected High Temp (F)**:
- Expected Low Temp (F)**:
- Weather Details**:
- Number Of Public Observers**:
- Comments**:

The form is set against a background image of horses in a field. The status bar at the bottom indicates "Record: 14 of 1 of 1" and "No Filter". The Windows taskbar at the bottom shows the Start button, several application icons, and the system clock displaying "8:23 AM 9/17/2015".

Form #3: Required Documentation

Required Documentation

Assessment ID Req Doc ID (New)

Assessment ID obtained from Day of Assessment Info page; Req Doc ID will be assigned when uploaded to central database.

May review with COR at end of day

Standard	Criteria	Compliant?	Comments
III.C.1 Major	1. Health records for saddle and pilot horses used on gather, including CVI, Coggins test, and vaccination records.	<input type="text"/>	<input type="text"/>
III.C.2 Major	2. Records for any saddle or pilot horse removed from and later returned to the gather, including new CVI.	<input type="text"/>	<input type="text"/>
II.B.5 Major	3. Physical contact of any WHB by helicopter.	<input type="text"/>	<input type="text"/>
II.C.2 Major	4. Roping of any WHB.	<input type="text"/>	<input type="text"/>
IV.C.2.h Major	5. Use of electric prod.	<input type="text"/>	<input type="text"/>
V.C.4 Major	6. WHB that is dead on trailer upon arrival at BLM preparation facility (COR/PI and Facility Manager).	<input type="text"/>	<input type="text"/>
V.C.4 Major	7. Any WHB that is non-ambulatory or recumbent upon arrival at BLM preparation facility (COR/PI and Facility Manager).	<input type="text"/>	<input type="text"/>
VI.A.5 Major	8. Any WHB that dies or is euthanized.	<input type="text"/>	<input type="text"/>
III.B.3.a,1 II.B.4.b Major	9. Authorization for separation of mare and dependent foal for more than 4 hours if not being weaned.	<input type="text"/>	<input type="text"/>

Trap Site: Facility Design, Care Provisions, and Biosecurity Assessment

IA.2 Minor	1. Location selected to minimize travel distance.	<input type="text"/>	Comments	<input type="text"/>
IA.1 Major	2. Materials are stout, secure, in proper working condition.	<input type="text"/>	Comments	<input type="text"/>
IA.12 Minor	3. Pens are constructed with rounded corners.	<input type="text"/>	Comments	<input type="text"/>
IA.4 Major	4. Fence panel at least 6' for horses, 5' for burros; bottom rail is no more than 12" from ground.	<input type="text"/>	Comments	<input type="text"/>
IA.13 Major	5. Fence panels and gates are covered with secured visual barriers with approx. 48" height with the exception of the initial capture pen as necessary	<input type="text"/>	Comments	<input type="text"/>
IA.1, IA.9 Major	6. Gates are hinged, self-latching, swing freely and latch securely. Entry to trap may be tied with ropes.	<input type="text"/>	Comments	<input type="text"/>
IA.8 Major	7. Padding is on overhead bars of gates and chutes in single file alleys.	<input type="text"/>	Comments	<input type="text"/>
IA.7 Major	8. No holes, gaps, openings, protruding surfaces, or sharp edges that could cause injury to WHBs.	<input type="text"/>	Comments	<input type="text"/>
IA.15 Minor	9. No trash, debris, reflective or noisy objects.	<input type="text"/>	Comments	<input type="text"/>
IA.3 Minor	10. If jute is hung on existing wire fence in the trap wing, wire of fence must be rolled up or let down for length of jute to minimize possible WHB entanglement, unless exception approved.	<input type="text"/>	Comments	<input type="text"/>
III.B.2 Major	11. Dust abatement equipment is available and was employed when necessary.	<input type="text"/>	Comments	<input type="text"/>
VIA.1 Major	12. Personnel authorized and trained to perform euthanasia and appropriate equipment are on site or within 1 hour travel time	<input type="text"/>	Comments	<input type="text"/>
VI.B.1 Major	13. Removal equipment is available to dispose of carcasses.	<input type="text"/>	Comments	<input type="text"/>
IV.C.2.a Major	14. If an electric prod is present, it is a commercially available model with DC batteries and is fully charged.	<input type="text"/>	Comments	<input type="text"/>

Form #5a: Trap Site: Gather Performance

Trap Site: Wild Horses _Burros			
Assessment ID	<input type="text"/>	TS Group ID	<input type="text" value="(New)"/>
Assessment ID must be obtained from Day of Assessment Info page once it has been entered into central database. TS Group ID will be auto-assigned when uploaded to database.			
Assessment Date	<input type="text"/>	Start Time (ex. 13:30)	<input type="text"/>
1. How many groups were assessed?	<input type="text"/>	Comments	<input type="text"/>
2. How many horses were assessed in total?	<input type="text"/>	Comments	<input type="text"/>
3. How many burros were assessed in total?	<input type="text"/>	Comments	<input type="text"/>
Gather Performance Handling Performance Electric Prods Roping			
Standard	Criteria	Compliant?	Comments
IV.B.1 Major	4. Gathers and trap site processing were performed during daylight hours.	<input type="text"/>	<input type="text"/>
II.B.7 Major	5. Ambient temperature at trap site was between 10 F and 95 F for horses 10 F and 100 F for burros Or approved by COR/PI and did not exceed 105 F.	<input type="text"/>	<input type="text"/>
II.B.5 Major	6. No physical contact was observed between the helicopter and any WHB.	<input type="text"/>	<input type="text"/>
II.B.2.a Major	7. Weak and debilitated WHBs were identified by staff and their capture was directed by PI/COR.	<input type="text"/>	<input type="text"/>
II.B.2.b Major II.B.2.c Major	8. Distance and rate of movement of WHBs set by PI/COR was not exceeded for any WHB, except animals requiring capture with compromised conditions prior to the gather.	<input type="text"/>	<input type="text"/>
II.B.1 Major	9. No evidence helicopter was operated to evoke repeated erratic behavior in WHB, causing injury or exhaustion.	<input type="text"/>	<input type="text"/>
II.B.1 Major	10. No animals were exhausted as assessed by the on-site veterinarian.	<input type="text"/>	<input type="text"/>
II.B.6 Major	11. Multiple attempts were used by the helicopter or capture by roping to bring in any mare/dependent foals together into the trap and not leave them separated.	<input type="text"/>	<input type="text"/>
II.B.3 Major II.B.6 Major	12. Capture was abandoned for any individual, mare/foal or jenny/foal pair following COR/PI approval.	<input type="text"/>	<input type="text"/>
II.B.6 Major	13. No half of a mare/dependent foal pair remained on the range after attempts to gather the pair.	<input type="text"/>	<input type="text"/>
II.B.2.c Major	14. Euthanasia was performed on the range on compromised WHBs.	<input type="text"/>	<input type="text"/>
VI.A.2 Major	15. Euthanasia was performed according to AVMA guidelines via gunshot or injection of euthanasia agent.	<input type="text"/>	<input type="text"/>
I.A.3 Major II.B.4 Major	16. Fence lines at the trap or en route to the trap allowed for safe passage and safety from entanglement.	<input type="text"/>	<input type="text"/>
III.B.3.a Major	17. Foals, weak or debilitated WHBs were separated prior to transport to temporary holding facility.	<input type="text"/>	<input type="text"/>
III.B.3.a Major	18. Separation of dependent foals from mares did not exceed 4 hours, unless authorized or a decision was made to wean foals. (Authorization must be documented.)	<input type="text"/>	<input type="text"/>
I.A.14 Major	19. WHBs were not disturbed by non-essential personnel or equipment (evidence of disturbance includes: WHBs balked or changed direction when they saw non-essential people, saddle horses or equipment).	<input type="text"/>	<input type="text"/>

II.C.4 Major	40. WHBs roped and tied in recumbency were monitored by attendant no more than 100 feet from animal.	<input type="text"/>	Comments <input type="text"/>																																																
II.C.5 Major	41. WHBs tied in recumbency were untied within 30 minutes.	<input type="text"/>	Comments <input type="text"/>																																																
II.C.6 Major	42. Helicopter drive trapping within the trap wings ceased while WHB was tied in recumbency within the trap wings.	<input type="text"/>	Comments <input type="text"/>																																																
II.C.7 Major	43. Sleds, slide boards, or slip sheets were used to move recumbent WHB.	<input type="text"/>	Comments <input type="text"/>																																																
II.C.8 Major	44. Halters and ropes were used to roll, turn, position, or load a recumbent WHB.	<input type="text"/>	Comments <input type="text"/>																																																
II.C.8 Major	45. No recumbent WHB was dragged across the ground by halter or rope attached to its body.	<input type="text"/>	Comments <input type="text"/>																																																
II.C.9 Major	46. WHBs captured by roping were evaluated by veterinarian within 4 hours, marked for identification, and re-evaluated by veterinarian periodically as deemed necessary.	<input type="text"/>	Comments <input type="text"/>																																																

Form #6a: Temporary Holding Facility: Facility Design

Temporary Holding Facility: Design, Care Provisions, and Biosecurity Assessment				
Assessment ID	<input type="text"/>	TH Facility ID	<input type="text" value="(New)"/>	
Assessment ID must be obtained from Assessment Day Info page once it has been entered into central database. TH Facility ID will be auto-assigned when uploaded to d				
Assessment Date	<input type="text"/>	Start Time (ex. 13:30)	<input type="text"/>	Comments <input type="text"/>
Facility Design Care, Health Biosecurity				
Standard	Criteria	Compliant?		Comments
I.A.1 Major	1. Materials are stout, secured, in proper working condition.	<input type="text"/>		<input type="text"/>
I.A.1 I.A.6 Major	2. An appropriate chute for restraint is available (does not apply to bait trapping) and is in working order.	<input type="text"/>		<input type="text"/>
I.A.12 Minor	3. Pens are constructed with rounded corners.	<input type="text"/>		<input type="text"/>
I.A.4 Major	4. Fence panel height is at least 6' for horses; at least 5' for burros; bottom rail no more than 12" from ground.	<input type="text"/>		<input type="text"/>
I.A.5, I.A.5.b Major	5. Number of pens is adequate to separate WHBs by: - Gender, age, number, temperament - Mares/jennies with dependent foals - Physical condition (weak/debilitated)	<input type="text"/>		<input type="text"/>
I.A.5.a Major	6. Pens are capable of expansion (extra panels on hand).	<input type="text"/>		<input type="text"/>
I.A.1.13 Major	7. Fence panels and gates are covered with secured visual barriers with approx. 48" height.	<input type="text"/>		<input type="text"/>
I.A.9, I.A.1 Major	8. Gates are hinged, self-latching, swing freely and latch securely.	<input type="text"/>		<input type="text"/>
I.A.11, III.B.1.b Major	9. If multiple water troughs are present, they are placed in separate locations in pen (e.g. opposite ends of pen).	<input type="text"/>		<input type="text"/>
I.A.8 Major	10. Padding is installed on overhead bars of gates and chutes.	<input type="text"/>		<input type="text"/>
I.A.7 Major	11. No holes, gaps, openings, protruding surfaces, or sharp edges are present that could cause injuries to WHBs.	<input type="text"/>		<input type="text"/>
I.A.15 Minor	12. No trash, debris, reflective, or noisy objects.	<input type="text"/>		<input type="text"/>
III.B.2 Major	13. Dust abatement equipment is available and was employed when necessary.	<input type="text"/>		<input type="text"/>
VI.A.1 Major	14. Personnel authorized and trained to perform euthanasia and appropriate equipment are on site or within 1 hour travel time.	<input type="text"/>		<input type="text"/>
VI.B.1 Major	15. Removal equipment is available to dispose of carcasses.	<input type="text"/>		<input type="text"/>
IV.C.1 Major	16. Handling aids such as flags and shaker paddles were the primary tools for driving and moving WHBs.	<input type="text"/>		<input type="text"/>
IV.C.2.a Major	17. If an electric prod is present, it is a commercially available model with DC batteries and is fully charged.	<input type="text"/>		<input type="text"/>

Form #6b: Temporary Holding Facility: Care, Health

Temporary Holding Facility: Design, Care Provisions, and Biosecurity Assessment				
Assessment ID	<input type="text"/>	TH Facility ID	<input type="text" value="(New)"/>	
Assessment ID must be obtained from Assessment Day Info page once it has been entered into central database. TH Facility ID will be auto-assigned when uploaded to d				
Assessment Date	<input type="text"/>	Start Time (ex. 13:30)	<input type="text"/>	Comments <input type="text"/>

Standard	Criteria	Compliant?		Comments
	18. Were WHBs held longer than 12 hours at facility?	<input type="checkbox"/>		<input type="text"/>
I.A.11, III.B.1.b Major	19. Water is available to all WHB, at least 10 gallons/1000 lbs WHB/day, if held more than 12 hours.	<input type="checkbox"/>		<input type="text"/>
III.B.1.c Major	20. Good quality hay is available. at least 20 lbs/ 1000 lbs WHB/day, if held more than 12 hours.	<input type="checkbox"/>		<input type="text"/>
I.A.11, III.B.1.a Major	21. Evidence is present that feed was provided and water refilled every morning and evening if WHB held > 12 hours.	<input type="checkbox"/>		<input type="text"/>
III.B.1.c.i Major	22. Hay does not contain poisonous weeds, debris, or toxic substances.	<input type="checkbox"/>		<input type="text"/>
III.B.1.c.ii Major	23. Placement of hay allows all WHBs to eat simultaneously.	<input type="checkbox"/>		<input type="text"/>
III.B.1.d Minor	24. Water and feed were adjusted for conditions on the range prior to gather.	<input type="checkbox"/>		<input type="text"/>
III.B.2 Major	25. Dust abatement equipment is available and was employed when necessary.	<input type="checkbox"/>		<input type="text"/>
III.A.1 Major	26. Veterinarian is available on-site or on-call.	<input type="checkbox"/>		<input type="text"/>
III.B.4.a Major	27. All WHBs were observed daily for health.	<input type="checkbox"/>		<input type="text"/>
III.B.4.c Major	28. Non-ambulatory WHBs are separated from the general population. Hay and water are accessible within 6 hours after recumbency unless directed otherwise by the veterinarian.	<input type="checkbox"/>		<input type="text"/>
III.B.4.d Major	29. The following animals are separated in pens from other WHBs: · Weak or debilitated WHBs · Mares/jennies with dependent foals	<input type="checkbox"/>		<input type="text"/>
III.B.4.f Minor	30. Stocking density: all WHBs in each pen occupy no more than half of that pen when at rest.	<input type="checkbox"/>		<input type="text"/>

	1. Do WHBs need to be trailered from trap site to temporary holding facility?	<input type="text"/>	Comments	<input type="text"/>
	2. If yes, how many trailer loads were assessed?	<input type="text"/>	Comments	<input type="text"/>
	3. How many horses were assessed in total?	<input type="text"/>	Comments	<input type="text"/>
	4. How many burros were assessed in total?	<input type="text"/>	Comments	<input type="text"/>
Handling Performance Electric Prods Roping				
Standard	Criteria	Compliant?		
IV.B.1 Major	5. Processing and sorting were performed during daylight hours.	<input type="text"/>	Comments	<input type="text"/>
IV.A.1 Major	6. Hitting, kicking, striking, beating was not observed.	<input type="text"/>	Comments	<input type="text"/>
IV.A.2 Major	7. Dragging without sled, slide board, or slip sheet was not observed. Ropes used for moving animal were attached to sled, slide board or slip sheet, unless being loaded per Section II.C.8.	<input type="text"/>	Comments	<input type="text"/>
IV.A.3 Minor	8. Deliberate driving WHB into other animals, gates, panels, equipment was not observed.	<input type="text"/>	Comments	<input type="text"/>
IV.A.4 Minor	9. Deliberate slamming of gates or doors on WHB was not observed.	<input type="text"/>	Comments	<input type="text"/>
IV.A.5 Minor	10. Excessive noise or activity causing flighty, disturbed, agitated WHB was not observed.	<input type="text"/>	Comments	<input type="text"/>
IV.B.2 Minor	11. All WHBs entered runway/chute facing forwards.	<input type="text"/>	Comments	<input type="text"/>
IV.B.3 Minor	12. All WHBs remained in single-file alleyways, runways, or chutes less than 30 min.	<input type="text"/>	Comments	<input type="text"/>
IV.B.4 Minor	13. Equipment, except for helicopters, was operated and located to minimize flighty behavior.	<input type="text"/>	Comments	<input type="text"/>
IV.A.5 IV.B.4 Minor	14. No WHB fell due to handling, excessive noise, sudden activity, or equipment operation (select Yes if it did not occur).	<input type="text"/>	Comments	<input type="text"/>
IV.C.1 Major	15. Handling aids such as flags and shaker paddles were the primary tools for driving and moving WHBs	<input type="text"/>	Comments	<input type="text"/>
III.B.4.b Major	16. Separation of dependent foals from mares did not exceed 4 hours, unless authorized or a decision was made to wean foal. (Authorization must be documented.)	<input type="text"/>	Comments	<input type="text"/>
III.B.4.c Major	17. Non-ambulatory WHBs were examined by the BLM horse specialist or on-call/on-site veterinarian within 4 hours of recumbency.	<input type="text"/>	Comments	<input type="text"/>
III.B.4.e Minor	18. Aggressive WHBs causing serious injury to other WHBs were relocated to a separate pen if possible.	<input type="text"/>	Comments	<input type="text"/>
VI.2 Major	19. Euthanasia was performed according to AVMA guidelines via gunshot or injection of euthanasia agent.	<input type="text"/>	Comments	<input type="text"/>

Form #7b: Temporary Holding Facility: Electric Prods

Temporary Holding Facility: Wild Horses _Burros

Assessment ID: TH Group ID: (new)

Assessment ID must be obtained from Day of Assessment Info page once it has been entered into central database. TH Group ID will be auto-assigned when uploaded to database.

Assessment Date: Start Time (ex. 13:30):

1. Do WHBs need to be trailered from trap site to temporary holding facility?	<input type="text"/>	Comments	<input type="text"/>
2. If yes, how many trailer loads were assessed?	<input type="text"/>	Comments	<input type="text"/>
3. How many horses were assessed in total?	<input type="text"/>	Comments	<input type="text"/>
4. How many burros were assessed in total?	<input type="text"/>	Comments	<input type="text"/>

Handling Performance **Electric Prods** **Roping**

Standard	Criteria	Compliant?		
	20. How many WHBs received at least one shock from electric prod?	<input type="text"/>	Comments	<input type="text"/>
IV.C.2.ab Major	21. Electric prods were fully charged and not concealed when used on WHB.	<input type="text"/>	Comments	<input type="text"/>
IV.C.2.d Major	22. Electric prods were only picked up to deliver stimulus and were not carried constantly.	<input type="text"/>	Comments	<input type="text"/>
IV.C.2.c Major	23. Three attempts with other handling aids were used unsuccessfully before an electric prod was used.	<input type="text"/>	Comments	<input type="text"/>
IV.C.2.e Major	24. Space in front of a WHB was available prior to application of electric prod.	<input type="text"/>	Comments	<input type="text"/>
IV.C.2.f Major	25. Electric prod was NOT used on the face, genitals, anus, or underside of tail of any WHB.	<input type="text"/>	Comments	<input type="text"/>
IV.C.2.g Major	26. Electric prod was NOT applied to any WHB more than 3 times without approval of COR/PI.	<input type="text"/>	Comments	<input type="text"/>

Form #8a: Transport at Trap Site: Trailer Design and Safety

Transport at Trap Site: Facility and Trailer Assessment				
Assessment ID	<input type="text"/>	Transport Facility ID	<input type="text" value="New"/>	
Assessment ID must be obtained from Assessment Day Info page once it has been entered into central database. Transport Facility ID will be auto-assigned when uploaded to database.				
Assessment Date	<input type="text"/>	Start Time (ex. 13:30)	<input type="text"/>	General Comments
<input type="text"/>				
Trailer Design and Safety		Loading and Unloading Areas		
Standard	Criteria	Compliant?		Comments
V.B.1 Major	1. Straight deck or stock trailer used; no double-deck or pot trailers. Indicate type and license plate number.	<input type="text"/>		<input type="text"/>
V.B.1.b Major	2. Trailers have covered roof or overhead bars.	<input type="text"/>		<input type="text"/>
V.B.3 Major	3. The width and height of all gates and doors allow WHBs to move through freely.	<input type="text"/>		<input type="text"/>
V.B.4 Major	4. Gates and doors open and close easily, latch securely.	<input type="text"/>		<input type="text"/>
V.B.5 Major	5. Rear doors can open full width of trailer.	<input type="text"/>		<input type="text"/>
V.B.6 Major	6. Ramps have non-slip surface and are in good working condition.	<input type="text"/>		<input type="text"/>
V.B.7 Major	7. A trailer 18-40 feet long has a partition to provide 2 compartments; a trailer > 40 feet long has partitions for 3 or more compartments.	<input type="text"/>		<input type="text"/>
V.B.8 Major	8. Partitions and panels inside trailer are free of sharp edges or holes that could cause injury to WHBs.	<input type="text"/>		<input type="text"/>
V.B.9 Major	9. Inside lining of trailer is strong enough to withstand failure by kicking that could lead to injuries.	<input type="text"/>		<input type="text"/>
V.B.11 Major	10. Surfaces and floors of trailer were cleaned prior to gather.	<input type="text"/>		<input type="text"/>

Form #8b: Transport at Trap Site: Loading and Unloading Areas

Transport at Trap Site: Facility and Trailer Assessment				
Trailer Design and Safety		Loading and Unloading Areas		
Standard	Criteria	Compliant?	Comments	
I.B.1 Major	11. Facilities are in safe and proper working condition.	<input type="checkbox"/>	Comments	<input type="text"/>
I.B.3 Major	12. No holes, gaps, openings, protruding surfaces, or sharp edges that could cause injury to WHBs.	<input type="checkbox"/>	Comments	<input type="text"/>
I.B.1.4 Major	13. Gates and doors open and close easily, swing freely, and latch securely.	<input type="checkbox"/>	Comments	<input type="text"/>
I.B.2 Major	14. Side panels of loading ramp/chute are at least 6 feet high and fully covered, e.g. with plywood or metal without holes.	<input type="checkbox"/>	Comments	<input type="text"/>
I.B.5 Major	15. Ramp/chute has non-slip surface and no holes or obstacles that could cause WHBs to slip, trip, or fall.	<input type="checkbox"/>	Comments	<input type="text"/>
I.B.5 Major	16. Ramp/chute is maintained in safe and proper working condition.	<input type="checkbox"/>	Comments	<input type="text"/>
I.B.6 Major	17. Trailer is aligned with loading and unloading chutes and panels such that no gaps exist between the chute/panels and floor or sides of trailer that could lead to WHB injury.	<input type="checkbox"/>	Comments	<input type="text"/>
I.B.7 Minor	18. Clearance allowance from ground to floor of stock trailer is no more than 18" for horses and no more than 12" for burros.	<input type="checkbox"/>	Comments	<input type="text"/>

Form #9a: Transport at Trap Site: Loading and Unloading Procedures

Transport at Trap Site: Wild Horses_Burros					
Assessment ID		Transport Group ID			(New)
Assessment ID must be obtained from Assessment Day Info page once it has been entered into central database. Transport Group ID will be auto-assigned when uploaded to database.					
Assessment Date		Assessment Start Time (ex. 13:30)			
Destination of trailer(s)		General Comments			
1. How many trailer loads were assessed?	<input type="text"/>	Comments	<input type="text"/>		
2. How many horses were assessed in total?	<input type="text"/>	Comments	<input type="text"/>		
3. How many burros were assessed in total?	<input type="text"/>	Comments	<input type="text"/>		
Loading/Unloading Procedures		Handling Performance		Electric Prod	
Standard	Criteria	Compliant?	Comments		
V.A.1 Major	4. Sorting and loading/unloading were performed during daylight hours.	<input type="text"/>	Comments	<input type="text"/>	
V.C.3 Major	5. Trailer provided minimum space in all compartments, as follows: a. 12 sq ft per adult horse b. 6.0 sq ft per dependent horse foal c. 8.0 sq ft per adult burro d. 4.0 sq ft per dependent burro foal	<input type="text"/>	Comments	<input type="text"/>	
V.A.2 Minor	6. WHBs were transported to the BLM preparation facility within 48 hours of capture.	<input type="text"/>	Comments	<input type="text"/>	
V.A.2.a Major	7. Shipping delays (e.g. release to range, on-site adoption) were approved by COR/PI.	<input type="text"/>	Comments	<input type="text"/>	
V.C.1.a Major	8. No nonambulatory, blind, or severely injured WHBs were loaded.	<input type="text"/>	Comments	<input type="text"/>	
V.C.1.b Major	9. No weak or debilitated WHBs were loaded without approval of COR and veterinarian.	<input type="text"/>	Comments	<input type="text"/>	
V.C.5 Major	10. No saddle horses were transported in same compartment as WHBs.	<input type="text"/>	Comments	<input type="text"/>	
V.A.3 Minor	11. WHBs were shipped in order of priority: 1. debilitated 2. pairs 3. weanlings 4. dry mares and studs	<input type="text"/>	Comments	<input type="text"/>	
V.C.2 Minor	12. WHBs were sorted for compatibility during travel to minimize possibility of injury.	<input type="text"/>	Comments	<input type="text"/>	
V.B.2 Major	13. During loading and unloading, all WHBs had adequate headroom. No head contact with roof or gate openings.	<input type="text"/>	Comments	<input type="text"/>	
V.B.2 Major	14. During transport, all WHBs had adequate headroom and were able to maintain normal posture with all four feet on floor and no contact with roof or overhead bars.	<input type="text"/>	Comments	<input type="text"/>	
V.B.10 Minor	15. Partition gates were used to distribute load during travel in trailers longer than 18 feet.	<input type="text"/>	Comments	<input type="text"/>	
V.A.4 Major	16. Planned drive time to BLM preparation facility/ destination does not exceed 10 hours.	<input type="text"/>	Comments	<input type="text"/>	
V.C.4 Major	17. Any WHB that was non-ambulatory or recumbent on arrival was evaluated on the trailer, and euthanized or removed using sled, slide board, or slip sheet.	<input type="text"/>	Comments	<input type="text"/>	
V.A.5 Minor	18. Vehicle holding WHBs did not exceed a combined period of 3 hours at a standstill during entire journey.	<input type="text"/>	Comments	<input type="text"/>
