1. If different from the Notice of Intent and Authorization to Conduct Geophysical Exploration Operations (NOI), show the lands, line locations, source points, and routes that you actually used for geophysical activities. To depict any deviations from what you had proposed in the approved NOI, we recommend a PDF version of a 7 1/2-minute USGS quadrangle or the USGS map scale commonly used in the area along with GIS data in a locally projected Universal Transverse Mercator (UTM) North American Datum (NAD) 1983 ESRI shape file or geodatabase format (e.g., UTM zone 13N NAD83). Maps and GIS data must include clearly attributed locations of operations and facilities planned in the NOI and any deviations from the NOI in the actual access routes to and within the project area, source and receiver point locations and lines, and source point locations used in your geophysical operations. Maps and data must also include surface ownership, Federal minerals, and any Federal lands under lease. Explain reasons for deviations from the original NOI.

2. Miles of source line or acres of survey on: a. Your Lease b. Other Federal lands

3. Describe how you plugged any shot holes.

4. If the Bureau of Land Management (BLM) or the Forest Service (FS) requests it, attach a copy of the "Hole Plugging Log" describing each shot hole, including whether holes were wet or dry, the static water level, flowing holes, breached or caved holes, or lost hole locations.

5. Describe any surface disturbance, disturbance locations, and how you reclaimed it.

I CERTIFY that the oil and gas explorations approved under the NOI were completed on _____ and that the operations complied with all terms and conditions of the approved NOI. (Date)
