(NOC)
(CRLP) Nick D. Bob L. Brad B. John S.
Kaylyn S. Mike D. Matt T.

Roll Call

➤ Noted

Nick D.-Antitrust guidelines apply. If there are any questions, please let me know.

Any update on COVID?

Sam B.-There is nothing new for protocols. We went from single to double coverage in the control room.

Good start up and purges on the gas.

Mark M.-Very pleased with how it started up and coming from a warm start. Current pressure is 958 and holding. We are still working with residue purity. We are producing just fine right now.

Mike D.-Is there a release of allocation coming?

Sam B.-We are going to try to get the pressure built up but Mark is working on that. I think the first decision target is 1300 pounds but we are working on that with Mark Welch and he will put that information out.

Nick D.-Near miss incident follow up.

Eric H.-There is a lot of talk about these incidents but I have not seen paperwork on these, I am beginning to get paperwork on some things but this needs to be addressed. These incidents are talked about but paperwork is not sent up to me so then an investigation cannot be conducted. If I don't receive paperwork then I cannot follow up with these incidents.

Nick D.-Discussed key control, lock procedures.

Anything else we need to discuss? Sam will have his call here in a couple of hours.
