- Brad Hayworth
- Roger Hall
- Dawn Jones

1. ANTITRUST COMPLIANCE GUIDELINES
2. GENERAL ADMINISTRATION
3. PLANT ISSUES, PROJECTS & EVENTS
 - **COVID-19 PREVENTION & RISK MINIMIZATION PROGRAMS**
 - COVID-19, stable
 - ACTUAL & NEAR MISS INCIDENTS
 - Messer identified safety concerns, related to possible bypassed safety systems. Working to further identify those and address those concerns.
 - PLANT OPERATIONS REVIEW
 - Nick – Master list needs to be identified and addressed.
 - DJ- I have the master list
 - Dawn- DJ's list is the master list, we communicate regularly.
 - DJ- Once PSSR is conducted tomorrow, list should be singled and worked on.
 - Nick- When you are ready DJ and Dawn, address issues as they are raised on master list.
 - Dawn- Additional lists keep things on task.
 - Nick- No objection to additional lists that helps keep everything on track. Unclear as to the size of tasks and managing them. I do not need the clarity, but DJ's team and Dawns team need to have that clarity.
 - Nick- If we work on the assumption that restarting the plant are we 2 or 3 weeks away, what is your best guess?
 - Dawn- The long pole in the tent has been mechanical integrity. I think we still have a few outstanding items that we need to tackle, DJ can speak a bit more about them.
 - ? MOC 7645, has to get it stamped and loaded. This MOC was sent to a lot of people. It was sent via email and should be easier to access if people would look in their emails.
 - ? 7641 is needed and is being searched for.
 - Nick- My understanding 7645 is completed and closed
