

GREAT AMERICAN OUTDOORS ACT

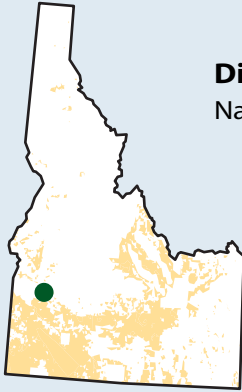

Airfield Ramp Tarmac Replacement

Project ID: L311

Building and Structures Project

IDAHO

District or Unit Name:
National Interagency Fire Center

Values:

The National Interagency Fire Center:

- Is the nation's support center for wildland firefighting and also supports other emergency responses, including floods, hurricanes, and earthquakes, as needed.
- Is an eight-agency partnership that shares supplies, equipment, and personnel; prioritizes critical, and sometimes scarce, resources; establishes policy; exchanges information; and trains personnel to ensure efficient and cost-effective incident management.
- Is a vital regional base for tactical response and home of the BLM Great Basin Smokejumpers, supporting complex fire incidents throughout the country.

Description: This project will repair the airfield ramp tarmac at the National Interagency Fire Center by replacing its most deteriorated portions of pavement. The replacement will be performed in accordance with Federal Aviation Administration circular requirements. These repairs will ensure the tarmac accommodates landings of all aircraft, including heavy military aircraft often used for firefighting.

GAOA Funding, Fiscal Year 2023:

\$2,500,000

Cost

Estimated Deferred Maintenance Reduction:

\$2,500,000

Benefit

Total Economic Impact of Project:

31

jobs supported

\$3.4 million

in economic contributions

Damaged tarmac at NIFC Airfield
