

Module Reflection Rubric

Module 2: Water Quality

Reflection: Design a Watershed

Describe your watershed.

How did you decide where to put all the features?

Why does your model watershed have healthy water quality?

Rubric Score	Description
5	Student provides a detailed description of their model watershed, a thorough explanation of the location of the features they included, and a logical, well supported justification for why their watershed has healthy water quality.
4	Student provides a detailed description of their model watershed, a thorough explanation of the location of the features they included, and a mostly logical justification for why their watershed has healthy water quality.
3	Student provides a detailed description of their model watershed and a thorough explanation of the location of the features they included but does not logically justify why their watershed has healthy water quality.
2	Student provides a basic description of their model watershed and a minimal explanation of the location of the features they included but does not logically justify why their watershed has healthy water quality.
1	Student provides a basic description of their model watershed but does not explain the location of the features they included and does not logically justify why their watershed has healthy water quality OR the response is blank, unreadable, or lacks the information necessary to communicate ideas.
