BLM Designation by Description (DxD) Scale Sale Timber Sale Process

Operations on this timber sale will be conducted under a Designation by Description (DxD) scale contract. DxD is also referred to as "Purchaser Select." This is a method of sale where the Government does not mark (paint) the timber to be cut and removed in the Salvage Harvest Area and Hazard Tree Removal Areas. Instead, the timber to be cut is designated by description, i.e., written cutting guidelines (Selection Criteria) which implement the silvicultural prescription and are made a requirement of the timber sale contract in accordance with Section 41(c) and 41(d).

1. Cruise: The variable plot cruise was implemented with the cruiser using the Selection Criteria for cutting in order to estimate the volume that would be cut and removed. The estimated volume was used for appraisal purposes and is delineated in this timber sale notice. In addition, this volume is delineated in the attached Exhibit B, and will be used to bill the Purchaser.

EXTENSION CREDITS: The Purchase of this salvage timber entitles the Purchaser to volume-for-volume and contract term-for-contract term extensions without reappraisal of qualifying BLM contracts for green timber held by the Purchaser.

CUTTING AREA: Approximately 40 acres of Salvage Harvest and 51 acres Hazard Tree Removal totaling 91 acres.

ACCESS: Access to the sale is provided by:

1. A public road;
2. BLM existing roads;
