Good Morning,

I discovered today that in the stipulation package Ted sent yesterday, we inadvertently left out one of the proposed stipulations for the protection of seals. Please add this to the requirements that Ted sent yesterday:

"Operations after May 1 would employ a full time employee in seal observation on all vibroseis vehicles to ensure all basking seals are avoided by vehicles by at least 500 feet and would ensure that all equipment with noise levels above 100 dB in air were operating at distances from observed seals that allowed for the attenuation of noise to levels below 100dB. All sightings of seals will be reported to BLM using a NMFS approved observation form."

Sorry for it not being included yesterday.

Thank-you,
Donna
