Understanding Assessments: The Comprehensive Animal Welfare Program promotes the welfare of wild horses and burros during management activities while minimizing stress and ensuring humane care, handling and treatment. CAWP assessments evaluate compliance with standards during the activities taking place at the time of the assessment. This framework helps ensure a clear and unbiased evaluation of events or actions as they occur. Here are some key points:

- **Holistic Approach:** Assessments reflect the entirety of the activity, not targeting individuals or specific groups.
- **Time-Specific:** The evaluation focuses solely on the observed circumstances during the assessment period.
- **Limitations:** Previous or subsequent events are not accounted for, meaning the assessment is a standalone observation.

General Notes and Comments from the CAWP Team: During the assessment, the team observed the preparation of wild horses, including the administration of primary vaccinations, the application of freeze marks and microchipping. As required by BLM policy, new needles were used for each vaccination and microchip.

The preparation team worked well together to keep an efficient, effective, and safe working environment for staff and wild horses by ensuring the preparation process flowed well. The staff demonstrated skills in handling the wild horses, ensuring that the animals' health and well-being remained their priority. The Palomino Valley Center Off-Range Corral has enrichments that provide shade and windbreaks in more than just the compromised animal pens.

Requirements of Permanent Instruction Memorandum (PIM) 2021-002, Wild Horse and Burro Comprehensive Animal Welfare Program (CAWP):

- All state, district, and field offices will continue to comply with the WHB CAWP policy within their jurisdictions at all times. This includes the CAWP Standards for Off-Range Corral Facilities, Transportation, and Adoption/Sale Events.
- All personnel, including contractors and partners involved in the care, handling, and transportation of wild horses and burros at off-range corrals and adoption/sale events are required to complete training annually.

All personnel were current with CAWP training.

Conditions found to be in non-compliance with the CAWP Standards for Wild Horse and Burro Off-Range Corrals:

Facility Design

Standard

- 1.II.F** Fences in pens, alleys, and working chute systems must be not less than 6 feet high for horses, 5 feet high for burros, and the bottom rail must not be more than 12 inches from ground level.

Non-Compliance: Some gates were more than 12 inches from the ground to the bottom rail. While this issue is actively being addressed, it had not been resolved at the time of the assessment.

Feed and Water

Standard

- 1.IV.C.6** Salt and/or mineral blocks should be provided in holding pens at all times.

Non-Compliance: Salt and/or mineral blocks were not in all holding pens.

Preparation Procedures

Standard

- 1.IV.D.6** Facilities must adhere to the current BLM vaccination policy.

Non-Compliance: The BLM vaccination policy requires vaccinations to be given every six months. Booster vaccinations were missing on some of the randomly selected paperwork that was reviewed.
