

Program Element EP

Process Mineral Material Disposals from Community Pits and Common Use Areas

Example Notes: None

PE Description: Program element **EP** includes all work associated with mineral materials sales from community pits and common use areas. Includes all costs of processing the applications for exclusive (competitive and non-competitive) and non-exclusive sales contracts, regardless of the date the application was submitted. Includes NEPA, valuation report, Section 7 consultation, Section 106 compliance, and other clearances for processing use authorizations as appropriate, and all associated case recordation and data entry, with the following exceptions.

Includes the cost of land use planning amendments and commercial activity plans prepared solely for a community pit or common use area designation or for an individual disposal within these areas. Multidisciplinary planning costs are no longer coded to this program element or to functional area 1330. Costs for multidisciplinary land use plans are charged to functional area 1610.

Mineral materials free use permits and permits for exploration, sampling and testing are no longer coded to this program element. All costs for mineral materials permits should be charged to program element FW.

Law enforcement duties are no longer coded to this program element. All costs of law enforcement should be charged to one of the following program elements: NU, NV, NY, NZ, and OA.

Each of the mineral materials case-by-case cost recovery document types (non-competitive sales, competitive sales, or contract renewals) for locations outside of designated community pits and common use areas that are processed in response to applications submitted on or after November 7, 2005 (the effective date of the cost recovery regulations) are coded the program elements specified below.

Document Type	Program Element Non-GK
Non-competitive sales contracts	GK
Competitive sales contracts and contract renewals	GL

Unit Of Measure: Contracts issued - Number of exclusive (noncompetitive and competitive) contracts, number of competitive contract renewals. And number of non-exclusive sale contracts processed (issued, rejected or withdrawn) within community pits and common use areas, the number of community pits/common use areas designated, and the number of community pits/common use areas closed after all reclamation is completed. Contracts and community pits/common use areas are tracked by date of processing in LR2000 and ALIS for Alaska. Offices will enter information in accordance with data standards; enter data at the time of contract issuance. Offices will report on number of authorizations issued during the fiscal year by category (i.e., exclusive mineral materials sales, non-exclusive mineral materials sales, designation of community pits, common use areas, and the number of community pits/common use areas closed after all reclamation is completed).

**System Interface/
Data Elements:** LR2000 and ALIS for Alaska data. Casetype/Action Code relationship that will be used for counting accomplishment are shown: Casetype/AC's to Count

3602xx/ only one unit for 276, 125, or 130
3604xx/ only one unit for 276 for pit established, then one unit for each individual sale corresponding to an entry of either 507 or 508
3605xx/ only one unit for 276 per case for area established, then one unit for each sale corresponding to each entry of either 507 or 508
3611xx/ only one unit for either 276, 125, or 130
36131x/ only one unit for either 276, 125, or 130
36132x/ one unit for 276 for initial sale, plus one unit for each 279 entry for each renewal.
362xxx/ only one unit for 276 for each case
EP Accomplishment is the Sum Total of Counts for the Selected Time Period

National Program Element Contact: George Brown/Mitchell Leverette, WO 320, (202) 912-7118

Project Code: Section 7 costs, covering both formal and informal consultation, associated with this program element should be tracked using the project code SECS. The project code SECS shall be used as a priority if there is not otherwise a mandatory project code (such as reimbursable work, construction, deferred maintenance, etc.).

Strategic Plan

Mission Goal: M2.G3.S3 Manage non-energy mineral development

BLM Work Process: 4 - Authorize Use

Program Element FW

Process Mineral Material Disposals Through Permits

Example Notes: None

PE Description: Program element **FW** includes all work associated with mineral materials sales from community pits and common use areas. Includes all costs of processing the applications for exclusive and non-exclusive free use permits and exploration permits for sampling and testing, regardless of the date the application was submitted. Includes NEPA, valuation report, Section 7 consultation, Section 106 compliance, and other clearances for processing use authorizations as appropriate, and all associated case recordation and data entry, with the following exceptions.

Includes the cost of land use planning amendments or commercial activity plans prepared solely for a community pit or common use area designation or for an individual disposal. Multidisciplinary planning costs are not coded to this program element or to functional area 1330. Costs for multidisciplinary land use plans are charged to functional area 1610.
